

# Comcast Business Solutions for Federal Government

Our high-speed, high-capacity data, voice and video services operate across our private, diverse nationwide network, which helps agencies run bandwidth-intensive applications, securely access cloud and data center resources, and seamlessly connect geographically dispersed locations across the nation.

With over 185,000 route miles of fiber, powered by the nation's largest Gig-speed network and the largest facilities-based last mile alternative to the phone company, Comcast Business can deliver reliable, scalable, secure service to agencies of any size, and provide a great experience for our customers.

Comcast Business offers advanced Wi-Fi, video and voice solutions for unified communications that help enhance collaboration across agencies, bases and remote workers.

We support your mission with 24/7/365 customer support. Learn more at [business.comcast.com/FedGov](https://business.comcast.com/FedGov)

## Solutions Portfolio

Comcast Business offers a wide range of data, voice, video, and managed services, including:

### Software-Defined Network (SDN)

- **ActiveCore<sup>SM</sup> SDN Platform** – An intuitive self-service portal to monitor, manage and deploy network services quickly and cost-effectively.
- **Software-Defined Wide Area Network (SD-WAN)** – Secure IP VPN connections, application-aware routing and integrated stateful firewall for simplified WAN management.
- **Managed Router and Firewall** – Lifecycle router management from initial configuration to ongoing management and support. Firewall configuration to help protect LANs from internet threats, with customized firewall rules.

### Voice

- **Comcast Business Voice** – Range of basic calling features and Voice Mobility.
- **SIP Trunks** – Next-gen voice solution providing a dedicated connection from a customer's IP PBX to the Comcast network.
- **ISDN PRI** – Physical connection from a customer's TDM-based PBX to one of the nation's largest VoIP networks.

### Video Services

- **Business TV** – Public and private options with the channels and services you need.
- **Xfinity Stream** – Watch live TV from any device – mobile, tablet, or computer. Included for up to 5 streaming at no additional cost with Comcast Business Private View TV service.

### Data Networking

- **Ethernet** – Reliable, scalable, high-performance Internet, point-to-point, and point-to-multipoint services over a national advanced network. With capacity from 1 Mbps to up to 100 Gbps.
- **Direct2Cloud** – Connectivity to multiple cloud providers including AWS, Microsoft Azure and IBM Cloud, plus 700+ data centers nationwide.
- **Business Internet** – “Business Internet 1 Gig” and “Business Internet 500” speed tiers available across Comcast service areas.
- **WiFi Pro** – WiFi for back office use by employees and a guest network for visitors.
- **Connection Pro** – Automatic 4G LTE wireless backup for up to 8 hours available for Comcast Business Internet customers.

### Cybersecurity Solutions

- **Comcast Business SecurityEdge<sup>TM</sup>** – Helps protect Internet-connected devices from malware, ransomware, phishing, botnets and more.
- **DDoS Mitigation** – Real-time detection and mitigation of denial of service attacks. Routes clean traffic to its endpoint to help maintain network uptime.

### IT Deployment Services

Full suite of deployment and break-fix services that can respond quickly to business needs.

- **Professional Installation** – On-premise installation, technology integration, and test and turn-up.

## Service Matters

Whether you're a member of the military starting a civilian career, a veteran entrepreneur building a business, or a military spouse, you're important to us. Comcast Corporation has been recognized for several consecutive years as one of America's Top Veteran-Friendly Companies, as well as for our commitment to diversity and opportunity for employees, suppliers, and applicants.
